Case dimensions are measured internally, length by width by depth.

Safety knife designed to add creases and cut case to size. See page 45.

Corrugated cardboard has the highest recycling rate of any type of packaging in the UK and the majority of corrugated boxes are made of predominantly recycled materials. The 'Corrugated Recycles' symbol is carried on most cases in the Kilby Packaging stock range to raise awareness of cardboard's green credentials.

Select 48mm or 75mm packaging tape for sealing boxes. See page 22.

\*Printed 'fragile'.

Double wall stock cases are now more commonly made of a combination of E and B flute, rather than the traditional B and C flute. The EB flute gives good box strength and rigidity but takes up less room when stacked flat for storage and transportation, reducing fuel costs and CO2 emissions.

## Double Wall Cases

The two layers of fluting of a double wall case give greater strength and rigidity making them suitable for heavier weights, higher value items or providing extra protection in transit.
